Subject: Post-doctoral position available (12 months)

A post-doctoral position for 12 months starting in April or May 2019 is available in our laboratory. The research project concerns the multi-step synthesis of new fluorescent phenazine derivatives. These molecules will be used for (bio)imaging applications.

Profile of the candidate:

The candidate must have a strong background in molecular chemistry and more specifically in organic synthesis. Skills in photophysics will be appreciated.

Application:

Detailed CV with a summary of work and two recommendation letters, can be sent by email to Dr. Olivier Siri at the following address: olivier.siri@univ-amu.fr
